PROFESSIONAL SUMMARY

Software Engineer with over 5 years of experience building scalable, secure, and high-performance backend systems for fintech, research, and web platforms. Specialise in .NET, C#, Node.js and TypeScript, designing APIs, microservices, and distributed systems that power real-world financial workflows payments, transactions, authentication, and monitoring. Driven by solving business problems, not just writing code, with a focus on reliability, clean architecture, and impact in emerging markets.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript (ES6+), SQL, HTML, CSS

Backend & Frameworks: ASP.NET Core, .NET 8/9, Node.js, Express.js, NestJS, Entity Framework Core, Dapper, SignalR

Frontend: React, React Native, Angular

Architecture: REST APIs, Microservices, Distributed Systems, Clean Architecture, Agile/Scrum

Databases: PostgreSQL, SQL Server, MySQL, MongoDB

Cloud & DevOps: Azure, Docker, Azure DevOps, CI/CD, Git

Other: Unity 6 (VR/XR), Oculus Quest 3, Security & Data Protection

WORK EXPERIENCE

Software Engineer

Sep 2025 – Present

[SterlingPRO Business Applications](#) • Lagos, Nigeria

- Build and maintain backend systems across the financial services domain, card transaction monitoring, settlement and reconciliation, ATM monitoring, POS/teller and cross-border payment workflows using C#, .NET 8 and clean architecture.
- Developed a card settlement and reconciliation platform on .NET 8 with a containerised (Docker), layered clean-architecture design.
- Built and modernised real-time ATM and transaction monitoring applications using SignalR, Entity Framework Core and Dapper for live status tracking and high-throughput data access.
- Worked on biometric onboarding and merchant-facing dashboard applications with React and TypeScript front-ends backed by .NET APIs.
- Implemented secure key-management and encryption modules (including ATM key handling) within a regulated financial environment.
- Diagnosed and resolved production issues, improving the reliability and stability of mission-critical financial systems.

VR Developer & Software Engineer

2023 – 2025

[Institute of Genomics and Global Health \(IGH\)](#) • Lagos, Nigeria

- Designed and developed VR educational applications with Unity 6 and Oculus Quest 3, enabling interactive exploration of DNA, RNA, proteins and virus structures (e.g. HIV, SARS-CoV-2).
- Led development of the official Hackathon website — registration, team selection and project tracking across biology, C#/Unity and 3D-design tracks.

- Built interactive virtual laboratory scenes with XR grab interactables, molecule selection, teleport anchors and voiceover guidance.
- Wrote custom C# scripts for user interaction, animation and game-like VR experiences; mentored students on using VR for molecular biology.

Full-Stack / Backend Developer

2022 – 2023

BlueLoop • Nigeria

- Contributed to transitioning a backend codebase from Express.js to NestJS, improving modularity, structure and scalability.
- Designed and implemented APIs for user authentication and login, with robust security and data-protection measures.
- Managed and queried PostgreSQL databases for efficient, reliable data storage and retrieval.
- Collaborated via Git pushing, forking, reviewing and merging code — and took part in code reviews to maintain quality standards.

SELECTED PROJECTS

Treda Marketplace API [.NET 9, PostgreSQL, Docker, Clean Architecture](#)

Production-ready classifieds marketplace backend: vendor onboarding with email OTP, JWT auth, product listings, real-time messaging, order tracking, and an integrated vendor wallet. Deployed on Render with Docker; monitored via Prometheus and Sentry.

Natours Tours & Payments API [Node.js, Express, MongoDB, Stripe, JWT](#)

Secure tour-booking platform with Stripe payment processing, JWT authentication with bcrypt, and production-grade API security rate limiting, Helmet, NoSQL-injection sanitisation, XSS and HPP protection.

.NET E-Commerce Platform [.NET 8, Onion Architecture, EF Core, React, TypeScript](#)

Full-stack e-commerce app with a .NET 8 backend in Onion architecture (Domain, Application, Infrastructure, API layers) on EF Core + SQL Server, and a React + Vite + Tailwind frontend with product catalog, cart and authentication.

Bookit Hotel Booking [Next.js, TypeScript, React \(in progress\)](#)

Hotel booking application browse hotels, view room details and make reservations through a clean, responsive interface. Currently in active development.

JustMove Global (client project) [React, deployed on custom domain](#)

Designed, built and deployed a production website for a travel & immigration agency (justmoveglobal.com) destination showcases, services, testimonials and an enquiry flow across 200+ destinations.

EDUCATION

B.Sc. Human Physiology Ambrose Alli University, Ekpoma · 2018 – 2021

Senior School Certificate (NECO) Marigold College, Oworoshoki, Lagos

CERTIFICATIONS

- Microsoft Full Stack Developer Professional Certificate (Coursera) · In Progress
- Introduction to Programming with C# Microsoft (Coursera), 2026
- Foundations of Coding Full-Stack Microsoft (Coursera), 2026
- Foundational C# with Microsoft, 2024
- The Complete Full-Stack Web Development Bootcamp Udemy, 2022
- Understanding TypeScript Udemy, 2024
